## 2<sup>ND</sup> MAYOCON-2018

### Master Class in Urethroplasty

Dear Prof/Dr.,

#### Greetings from 2<sup>nd</sup> Mayocon 2018 - Master Class in Urethroplasty

On behalf of the MAYOCON Organizing Committee, we are delighted to invite you as a delegate at our **2<sup>nd</sup> Mayocon Academic Master Class in Urethroplasty 2018**, organised by Urology Department Mayo Hospital, Mohali, along with Co-Organising Partner **Punjab Medical Council (PMC), International Society of Reconstructive Urologists & "Mayo Stem Cell Study Group**, which will be held on 15-16 September 2018 at Chandigarh, India. This brings key opinion leaders in the field of **Urethral Surgery** and Regenerative medicines, at one place. It provides a platform to have open discussions, knowledge sharing and interactive sessions with field experts.

#### Excerpts from the Book - "Atlas of Urethroplasty "

The level of specialization now talks of Anterior Urethral, Bulbar Urethral and Posterior Urethral surgeons. We cannot restore the factory settings of any machine (human body being the most complex one manufactured by God) but, we can become the second factory where such machines come for repair. Our aim as Urethral Engineers is to standardize each procedure down to the finest detail much akin to the assembly line system.

Our aim is not to confuse the young budding urethral engineer into the maze of the number of procedure available but to present before him 10% of the procedure which if mastered can cure more than 90% of the strictures.

A word of advice for the young urethral surgeons-Press on. "Nothing in the world can take the place of persistence. Talent will not; nothing is more common than unsuccessful men with talent. Genius will not; unrewarded genius is almost a proverb. Education alone will not; the world is full of educated derelicts. Persistence and determination alone are omnipotent" - (C. Coolidge).
